

ARUNACHAL

ORCHIDS PRICE LIST

The Orchid Research and Development Centre, Tipi, Forest Department of Arunachal Pradesh, has so far been actively engaged in the conservation and multiplication of rare and ornamental native orchids through vegetative seed and meristem cultures and has successfully established an Orchid Sanctuary at Sessa and a good germ-plasm bank of orchids cultivated at main centre Tipi and its sub-centres at various elevations. There are number of new species and new records discovered and described by this Centre.

Keeping in view of developing an orchid Industry in this part of the country and to share the joy of orchid growing with the fellow orchidists, we are now pleased to announce the release of following multiplied orchids for sale.

We believe "**Cultivation is conservation**" and would like you to join hands with us in cultivating orchids thereby ensuring conservation.
